

MEDICAL LABORATORY TECHNOLOGISTS FOR CHEMISTRY DEPARTMENT

Alpha Healthcare is a public purposed private company with two clear missions: to reform community laboratory services for the benefit of patients and to build new confidence in quality assurance of health-related products. The Alpha Promise is to improve public health care by finding ever better ways to serve those who provide it. Our highly collaborative team is seeking Medical Laboratory Technologists for the Chemistry department.

It is a Full-Time position, regular mornings, however occasional rotational shifts, including Saturday rotation may be required

Responsibilities and Duties:

- Perform routine, “special” and/or complicated tests in those specialties and subspecialties in which qualified by education, training and experience.
- Maintain and monitor all equipment, reagents and supplies to ensure optimum performance at all times.
- Verify all quality control results to ensure that they fall within the established limits of acceptability before patient results are reported to the ordering physician.
- Ensure compliance with all quality management practices in the laboratory.
- Attend to all matters of concern brought to your attention by taking appropriate corrective actions as soon as possible.
- Alert the charge technologist or laboratory supervisor of all unusual events and abnormal test findings.
- Assist in the “in-service” training and supervision of laboratory technical assistants/technicians.
- Ensure that proficiency testing samples are processed in the same manner as patient samples.
- Procure specimens from patients only at the request of physicians by following the techniques and using supplies as indicated in the “Specimen Collection Manual” of this laboratory.
- Keep accurate records of pertinent information or specimens and tests processed by you.
- Follow all safety policies and procedures, as outlined in the “Laboratory Safety Manual”.
- Carry out routine preventive maintenance programs (if required in the work shift) on all equipment, (manual, semi-automated, and fully automated) used in each department of the laboratory, by following maintenance schedules as established for each equipment and keeping detailed records of what was done, when it was done and the initials of the person who actually performed the maintenance.
- Perform tests and procedures for which the laboratory is licensed, without change or deviations as described in each laboratory section.
- Perform “initial” and “external” quality controls on each test procedure (where applicable) by following the policies and instructions as described in the manuals.
- Record all readings, calculations and results obtained on patient tests, quality control material and standards as observed by you during performance of your duties.
- Verify your work, by initialing and dating all work sheets, reports, records and quality control results, etc. at time of documentation.
- Repeat or confirm all abnormal results (tests and controls) before reporting them.

- Maintain proper records of all tests, quality controls, equipment maintenance, continuing education, etc., as carried out in your section(s) of the laboratory.
- Perform other duties and responsibilities, technical and non-technical, as may be reasonably assigned

Qualifications and key requirements:

- CMLTO registration as a practicing Medical Laboratory Technologist in good standing.
- 1-2 years of experience in Chemistry
- Works well under pressure, exudes and maintains a professional demeanor
- Interacts and collaborates positively with other team members.

Ethical Conduct

Diversity, equity, inclusion and belonging are fundamental to Alpha Labs. We live this through the strength and richness of our diverse staff. Our core values include trust, respect, and compassion.
